# President's Message

**T**he year 2020 proved to be a challenging year, not only for our local community, but also for the world. All sectors of the society are necessitated to leave behind the conventions for a new form of normal. The COVID-19 pandemic was an adversity that no one saw coming. However, this did not stop Cagayan State University from its mission and vision to be a learning institution of global stature and in adhering to global standards across fields of professional expertise. In fact, the pandemic paved the way for more opportunities to innovate and transform as an institution.

In response, CSU adapted the Flexible Learning Scheme to make remote learning available for students. The newly developed CSU Learning Environment System (LENS) became the main platform in bridging the teacher and student in the new normal. The faculty was also equipped through a series of training and seminars to adapt new teaching strategies that are suited to the current set-up. The year also saw the completion of the construction and rehabilitation of various infrastructure projects in the different campuses, giving provision for learning productivity. In addition, more edifices are under construction to better create education inductive spaces for students post-pandemic.

The Research and Extension arm of the University also remained steadfast in mobilizing research to not only increase livelihood opportunities for the community but to also be pandemic-responsive in its intent while producing research outputs.

Strengthened alumni relations was also visibly seen this year as the alumni community raised funds to buy servers to accommodate more CSUans on the online learning platform. Moreover, Alumni Centers in the different campuses are also being put up to seal the link of the graduates to the University.

The accomplishments of the University this year are made more fruitful and meaningful because it enabled the University to think outside the box, to step away from the conventions, mark new territories, and take steps that were never done before. If there is one thing that it is able to do, CSU will always adapt with the times to be of service to the community. With the strong and dynamic officials, faculty, staff and students - CSU will continue to see breakthroughs in every adversity and challenges.

## *Vision*

Cagayan State University is a University with global stature in the arts, culture, agriculture and fisheries, the sciences as well as technological and professional fields.

## *Mission*

Cagayan State University shall produce globally competent graduates through excellent instruction, innovative and creative research, responsive public service and productive industry and community engagement.

## *Core Values*

### **Competence**

Critical Thinker  
Creative Problem -Solver  
Competitive Performer: Nationally, Regionally and Globally.

### **Social Responsibility**

Sensitive to Ethical Demands  
Steward of the Environment for Future Generations  
Social Justice and Economic Equity Advocate.

### **Unifying Presence**

Uniting Theory and Practice  
Uniting Strata of Society  
Unifying the Nation, the ASEAN Region and the world  
Uniting the University and the community.

# INSTRUCTION

---

The academic undertakings in the university for the year 2020 have been greatly challenged by the onset of COVID-19 pandemic which saw a series of community quarantine being implemented nationwide. This was compounded by a series of natural calamities and disasters that hit Cagayan that is brought about by Typhoon Ulysses and others. These unforeseen happenings effectively restrained both faculty and students within the confines of their homes for a larger part of the year in order to prevent the transmission of COVID-19 and to recover from the physical damages brought about by the typhoons in November and December of 2019.

These crises have greatly hampered the conduct of face-to-face classes and have limited the amount of time for the conduct of capability building programs for faculty to upgrade their knowledge and skills. However, in an effort to continue the delivery of relevant and quality education, the university has established the online learning platform called LENS, where majority of classes university-wide have since taken place. The problem on internet connectivity experienced by both faculty

and students has been resolved through the use of printed modules. Since second semester of the Academic Year 2019-2020, the university has implemented the blended and flexible learning modalities of instruction. Aside from LENS, other online and social media platforms have been used to reach students. Majority of students, both graduate and undergraduate, have benefitted from these modalities of teaching and learning.

Throughout the year, the Academic Department has continuously provided the much-needed technical and administrative support through webinars and workshops and crafted academic policies to provide guidance for the successful implementation of flexible learning. The Office of the Director of Instruction (ODI), Office of the Director of E-Learning and Office of the Director of Management Information System have closely collaborated for the university's transition into distant/online learning.

With the pandemic, several licensure examinations have been suspended or cancelled during the year. Despite this, CSU's performance exceeded its physical target as well as the national passing rate.

On faculty professional development, fourteen (14) faculty members have successfully completed their masteral/doctoral degrees which improves the Faculty Profile of the university. There is also the promotion in rank due to the implementation of NBC 461-7A cycle or Institutional Promotion (IP).

# FACULTY ENHANCEMENT AND CAPABILITY BUILDING

The university conducted a workshop on course internationalization which mainly focused on institutional strategies and good practices which ensured that courses and program activities included global perspectives.

The workshop was held at Claude Andrews Convention Center, CSU Andrews Campus on February 13, 2020. It was attended by the deans and academic coordinators of the different CSU campuses. A total of 76 participants attended the activity.

The workshop aimed at establishing an enabling environment to allow the students of Cagayan State University to meet the challenges and take on opportunities brought about by internationalization and ASEAN integration. Hence, it is necessary to integrate the elements of international course design in the curriculum of the university to include the Intended Student Learning Outcomes (ISLO), Course Content, Teaching and Learning Activities, Assessment Methods, Materials, and the Internationalization Strategies for each element. . The curriculum infusion requires preparation and rethinking of the course design and the transformation which is difficult to implement especially in certain disciplines. The main goal is the shift in cultural perspective and to move among different cultures and worldviews, while reinforcing the values, interests, and goals of the institution and national development.

The workshop also aimed at promoting a mindset among deans and the faculty of instruction to put people at its center, create an enhanced awareness of ASEAN, give emphasis on access to quality inclusive education, and prioritize the development of lifelong learning.

The Vice President for Academic Affairs discussed the topics on the Quality of Internationalization in Higher Education. This incapsulates the multi-dimensional perspectives which should embrace all the functions and activities that include internal self-evaluation and external review. These are vital for enhancing quality education as cited in CMO 55, s. 2016, Policy Framework and Strategies on the Internationalization of Philippine Higher Education.

“ *Internationalization is an intentional process, an empowering product and liberating mindset that infuses the international multicultural dimension into the purposeful functions and delivery of post-secondary and continuing education while reinforcing the values, interests, and goals of the institution, national development and ASEAN community building.* ”

~VPAA Mariden V. Caulan

The Director of Instruction also discussed the "4 Levels" of the Curriculum and the Strategies for Course Internationalization. She discussed three Main Approaches for Course Internationalization.

The University Focal Person for Gender and Development further discussed the Integration of Gender and Development in the course syllabus. Part of her presentation was Sec. 16 of the IRR of the Magna Carta of Women (MCW) which mainly encouraged the promotion of gender-sensitive curriculum, with the purpose of reviewing and revising programs, syllabi, textbooks, and other instructional materials. She also said that gender sensitive instruments for evaluation of materials and curricula, including criteria about gender concepts, values, and gender-fair language, must be developed.

As part of the workshop, the deans and Campus Academic Coordinators were tasked to revise their respective syllabi with international contents, including the possible use of virtual laboratory, and e-learning.

# CSU IRAGA EXTENSION OFFICIALLY LAUNCHED

In CSU's quest to providing quality tertiary education to every Cagayano youth, the Launching and Groundbreaking of CSU Iraga Extension transpired last February 7, 2020, which marked the start of the construction of a new and accessible higher education institution for the students of Solana, Amulung, and other nearby municipalities.

University President Urdujah G. Alvarado described the project as an impossible dream that has become possible through the persistence of Congressman Lara and the approval of the Board of Regents. President Alvarado further said that like the other campuses that have their own niche programs, the Iraga Extension will specialize in brooding and rearing of fish species. Fr. Ranhilio C. Aquino, the Vice President for Administration and Finance, also shared that CSU's Iraga Extension will offer academic programs in Teacher Education, Agriculture, Fisheries, Information and Computing Sciences, and Criminology. These are the preferred programs that were identified through a Feasibility Study conducted by a Technical Working Group led by Dr. Theresa B. Dimalanta.

Hon. Joseph L. Lara said that he is thankful to be an instrument of providing access to quality education in the remote areas of the province because as a parent himself he said that there is nothing better than for parents to see and embrace their children at the end of every day. Hon. Jennalyn P. Carag, Municipal Mayor of LGU Solana, shared in this view as she said that this project is a blessing for the municipality not only for students but also for their parents as transportation and commute allowances would be reduced from their worries.

In attendance to the event were CSU officials, representatives from lined-government agencies, barangay officials, and principals and students from the feeder schools of the municipalities of Solana and Amulung. The 34.5 Million CSU Iraga Extension project is made possible through the initiative of Hon. Joseph L. Lasam, 3rd District Representative of Cagayan, in close collaboration with Cagayan State University as the mobilizing agency. The extension is situated along the Barangay Road to Masin, near the Solana Fresh Water Fisheries School in Barangay Iraga, Solana, Cagayan.

1. CSU Aparri is the only campus that received scholarship slots for the Universal Access to Quality Tertiary Education Act of 2017(UAQTEA) for the Food and Beverage Services NC II. We received a total of 50 slots (2 batches) with a total of ONE MILLION FIVE HUNDRED EIGHTY FIVE THOUSAND SEVENTY ONE PESOS (PhP 1,585,071.00).
2. CSU Aparri received scholarship programs from TESDA for the following projects:  
a.) UAQTEA, b.) Training for Work Scholarship Program (TWSP) and c.) Competency Assessment and Certification for Workers (CACW). The campus received a total of ONE MILLION NINE HUNDRED FIFTY EIGHT THOUSAND SEVEN HUNDRED THIRTY ONE PESOS (PhP 1,958,731.00).
3. Last February 11, 2020, there was a Regional On-Site Validation for the System for TVET Accreditation and Recognition (STAR) in Aparri campus. The campus passed the regional evaluation with a rating of two-star making it a Center of Technical Proficiency for the program Food and Beverage Services NC II under the College of Hospitality Management (CHM). A national evaluation and validation team will visit the campus to validate the recognition. The CSU at Aparri made history for being the first SUC in the region who submitted for STAR.
4. CSU Aparri extends services of TVET programs to secondary schools and other constituents by conducting Enhancement Program to secondary school students and DepEd teachers.
5. The Campus Executive Officer challenged the college deans to offer at least one assessment center and/or register training center for their college. With this, the campus has a strong TVET programs driven by leadership.

**CAGAYAN STATE  
UNIVERSITY**

# ***Pandemic Responsive* INSTRUCTION**

## **FLEXIBLE LEARNING**

One of the greatly affected by the COVID-19 pandemic is the education sector. Thus, continuity planning is essential to the Cagayan State University's effectiveness and ability to fulfill its mission in teaching and learning. Classes were suddenly shifted to remote learning in the middle of the semester as face-to-face classes were suspended by the government in compliance with health and safety protocols. This recent experience with the COVID-19 virus underscores the importance of ensuring that CSU is prepared as an academic community to continue operations in the event that such circumstance is prolonged and continues to interrupt normal school attendance. Hence, the creation of the **Learning Continuity Plan**.

In developing a plan to help the University to thrive amid the pandemic, the Office of the President was guided by CSU's key strategies for learning continuity which are the following:

## **THE LENS**

Since face-to-face classroom instruction delivery has been interrupted, CSU is shifting to various modalities of instruction. Measures have been institutionalized for the development of printed modules. The university has also undertaken initiatives to explore the online modality through its LENS. **The Learning Environment Network System (LENS)** is the learning management system of the University that is powered by Moodle. It is focused on adopting to asynchronous type of learning activities in order to consider the poor internet connectivity of the students. The University has engaged the services of an expert who set up the LENS Project that worked closely with the Academic Department for the contents of the project and in coordination with the Academic Community, and with the Management Information System (MIS) Team for the software and hardware requirements.

Project LENS aims at achieving the following objectives:

- To set the directions in the transformation of CSU towards flexible learning;
- To develop module designs and strategies for online learning;
- To empower and train faculty members, administrators and staff on the use of LENS
- To develop system and processes to institutionalize LENS as platform for flexible learning;
- To develop value innovation and optimize resources to achieve graduate education outcomes of CSU.

It has adopted quality systems and procedures to ensure that the transition to flexible learning can be organized and is possible in the eight (8) campuses. The transition phases included the Introduction, Environmental Scanning, Design Planning, Capability Building, Implementation, Monitoring, Evaluation, and Continuous Improvement.

All eight campuses in the university used a server-based Learning Management System. Realizing the limitations of some of the students in terms of connectivity and the availability of gadgets for online learning, the University offered other mode of learning specifically modular. Distribution of modules was done through printed copies or e-copies. Parents or other family members were requested to receive the modules for students.

The Academic Department was responsible for the analysis, instructional design, development, implementation, and evaluation of courses. The CSU MIS Team ascertained the security, functionality, and credibility of the University's computer hardware, computer software, and internet connections. The university implemented the blended learning mode for the first semester of academic year 2020 – 2021 through online and modular platforms.

## **DISTANCE LEARNING**

Distance learning addressed the issue of social distancing in instruction. CSU implemented both the modular distance learning (MDL) and online distance learning (ODL) types.

For MDL, students used instructional materials in print or digital format, whichever is applicable in their context. Electronic materials can be accessed through their own personal gadgets. Students can interact with their teachers and classmates via other social media platforms like email, text messaging, or telephone. E-copy or print copy of learning materials were collected at a designated office in the campus where the student is enrolled. Because of age restriction, parents or guardians took responsibility in the acquisition of these materials.

In ODL, the teacher is the facilitator and engages students' active participation through the use of various technologies accessed through the internet while they are geographically remote from each other. Online learning allows live synchronous instruction and interactions between the teacher and students that can occur in real time. All learning materials can be downloaded from the internet and requirements and quizzes are submitted online. Students are provided with a variety of learning tools such as webinars, meetings, and virtual classes.

In CSU, ODL is supported by CSU-LENS, the learning management system (LMS). This is the strategy that CSU is adopting as it transitions from the conventional face-to-face to flexible or blended learning which is considered as the new normal in education. The online modality of instructional delivery using the CSU-LENS is a big leap in addressing continuity of education even when most students are not allowed to leave their homes due to government restrictions. With this platform the university can reach more students.

For SY 2020-2021, students are encouraged to completely go online for their courses. However, for those who are not able to go online because of limited or no internet connectivity, they are given an option to subscribe to printed or an e-copy of the learning materials.

While LENS is the standard Learning Management System in the University, the use of other platforms is likewise encouraged to allow greater number of faculty and students to do online learning. Hence, CSU also allows the use of the following: Facebook Page, Messenger, Schoology, Google Class, Microsoft 365. The University is currently finalizing its ties with government radio stations in the community for the use of the radio airwaves as an alternative mode of teaching.

To boost internet connectivity in the different campuses, the University has sought financial assistance from the campus alumni associations for the purchase of SERVER for each campus. CSU has likewise forged stronger collaboration with Local Government Units for campuses with low internet connectivity for the possible installation of internet connections in designated areas where students are enabled to participate in e-learning.

## RECALIBRATING AND DETOXIFYING THE CURRICULA

The Academic Department in the University undertook a review of the different curricula and contents of the syllabi in all academic program offerings and were calibrated to facilitate learning through multiple modalities of instruction especially with the use of online technology.

CSU has set goals for this transformation and were realized in four phases: the Curriculum Review, Detoxification, Integration, and Collaboration. Series of training were undertaken by the academic community in module development and the use of online and modular platforms as mode of delivery. The University President designated a Technical Working Group headed by the Vice-President for Academic Affairs that spearheaded the curriculum and syllabi review with the full participation of the Director of Instruction, College Deans, Campus Academic Coordinators, Department Chairs, and selected members of the faculty of instruction in the whole university system.

Subjects that are not mandated were removed and laboratory classes that exceed the required number of units by relevant CMOs were reduced accordingly. In the syllabi calibration, topics in the syllabi that are more essential and those that can be taught online or through printed materials were identified, related topics were integrated and requirements of different courses during the semester that can be integrated were likewise identified.

### **CALIBRATING THE CURRICULUM**

As early as April 2020, a Technical Working Group was created by the Office of the Vice President for Academic Affairs who laid down the policies and guidelines for the initial review of curricula. In May 2020, a Technical Working Group (TWG) for Curriculum Review was created by the Office of the President who further enhanced the policies and guidelines for the review of all curricula. This group is composed of the Vice President for Academic Affairs, Director of Instruction, Director of Admission, University MIS Director, a Campus Academic Coordinator, and a Technical Adviser. Based on the downloaded guidelines, College Deans and their Department/Program Chairs modified their respective curricula. The entire academic department collaborated in reviewing the curricula in an effort to calibrate them against standards set by the Commission on Higher Education as embodied in the different Policies, Standards, and Guidelines (PSG).

In consideration of the restrictions and challenges posed by the pandemic on delivery of instruction, particularly in terms of modality and resources, and without necessarily sacrificing quality over quantity, the curricula have undergone modifications in terms of the following:

1. Courses which were institutionally-mandated and added on top of prescribed General Education Curriculum (GEC) Core courses or elective courses, such as Euthenics and English Language Proficiency II, were deleted in the 2020 Curriculum for most academic programs. However, if these were part of the mandated General Education (GE) Electives, then these were retained in the curriculum. Filipino courses had been removed in most programs except in the Education, Arts, and Humanities.
2. The number of laboratory units and the corresponding actual contact hours in some courses have been reduced by one (1) unit or by 3 contact hours. This is particularly observed in some Chemistry courses being offered in the College of Allied Health and Sciences.
3. In the College of Industrial Technology, credit units for major courses was reduced from 7 unit (15 contact hours) to 5 units (9 contact hours). This effectively reduces the on laboratory units from 4 units (12 hours) to 2 units (6 hours). Such action is deemed necessary and practical as a budget-saving action as well as to reduce the need for part-time faculty. This also is deemed valid as there is still no existing PSG governing the BS in Industrial Technology program.
4. Some courses were re-sequenced in order to comply with the principle of pre-requisites or degree of importance.

It is worthy to note that the above modifications apply only to the First Semester, SY 2020-2021 courses in all year levels (I-III) as the need is immediate. It is, therefore, expected that the same procedure shall be applied to the Second Semester courses in order to complete the review.

### **DETOXIFICATION OF THE CURRICULUM**

A necessary action taken by the Cagayan State University is the training of academic deans and department/program chairs on course integration and reduction that was conducted last July 2020. On the other hand, reduction of curriculum content as a strategy allows the faculty to teach content that is essential and remove content that will not. Detoxified curriculum allows for alternate modes of course delivery and assessments while reducing curriculum pressures to cover all content.

Instructional materials that have already been utilized in instruction such as the GEC modules have undergone re-evaluation to ensure that contents are updated and that appropriate teaching and learning methods are used. One criterion to consider in selecting an approach is its workability in both online and offline learning environments.

### **ASSESSMENT STRATEGIES**

The two types of assessing learner outcomes, formative and summative, can be done both online and offline. Specifically, the following strategies were employed: 1) Peer assessment, 2) independent projects, 3) self-assessments, 4) learning journals, 5) portfolios, 6) video presentation and podcasts, 7) online discussions, 8) quizzes.

## **FLEXIBLE LEARNING MODALITIES**

This approach will integrate traditional classroom methods and online digital methods. With the installation of a learning management system (LMS) in all campuses of the university, one of the Academic Department's goals is to make blended learning an established modality of instruction in the university. This is an important goal to achieve as this can cushion the impact that any disruption in education in the future brought about by emergencies such as pandemic or natural disasters.

## **SUPPORT SERVICES FOR STUDENTS AND FACULTY**

CSU recognizes the evolving changes for faculty and students in teaching and learning. CSU is adopting the flexible learning modality of instruction effective first semester, SY 2020-2021. In order to ensure a smooth transition to this modality, CSU continues to support its faculty and students by advocating for faculty and student concerns as well as providing available teaching and community resources.

## **FACULTY SERVICES AND RESOURCES**

All faculty members are encouraged to be reasonable and compassionate without compromising quality in higher education. The following are the support services and resources that the university provides to faculty members as they maneuver through the teaching and learning process in the new normal.

# RESPONSE TO COVID-19

Cagayan State University remains steadfast and dedicated to serving the community amidst the fight against COVID-19 as administrators, faculty, staff, and students take action to mitigate the spread of COVID-19 and help the community, especially the frontliners, through relief packs and personal protective equipment.

CSU also took part in supporting the frontliners by donating Personal Protective Equipment (PPE) to secure our first line of defense against the virus. Additional PPE were also distributed which includes more than 280 improvised face shields, 65 scrub suits, 3 boxes of face masks, 100 pieces of N95 masks and 15 fiberglass face masks to Cagayan Valley Medical Center, OWWA Regional Office 02, and Tuguegarao City Rescue 1111.

Through its Central Analytical Laboratory, donated 550 pieces of masks and 3,200 pieces of nitrile laboratory gloves to the Department of Pathology and Laboratories of Cagayan Valley Medical Center.

Medical PPEs donated to OWWA-R02

Improvised Face Shields

Medical PPEs donated to CVMC

In light of the transportation halt, the deployment of e-trikes to transport health workers were also provided for Tuguegarao City People's General Hospital (TCPGH) and Cagayan Valley Medical Center (CVMC).

The Cagayan State University Central Analytical Laboratory also offers its services in testing free homemade alcohol without any charge. This test is important to make sure that the alcohol distributed for consumption passed the 70% ethanol mark which is deemed effective as sanitizer especially against COVID 19.

CSU, as a learning institution, also organized lectures and briefing sessions on Novel - Corona Virus (2019 - nCoV) COVID in campuses to ensure that the right information on the prevention of the virus is passed on to the whole CSU community. As a mitigation and safety precaution, most campuses also disinfected classrooms, offices, and other designated areas to ensure the safety of the CSUan community.

# RESEARCH and DEVELOPMENT

---

**T**he Research and Development (R&D) Annual Report presents information on the R&D activities undertaken during Calendar Year 2020. The report provides evidence that Cagayan State University is fulfilling its duty of promoting research in the University and meeting its targets as indicated in the National Expenditure Program (NEP), SUC Levelling and the CSU Medium Term Development Plan 2018 – 2021.

Every research project conducted, either institutionally or externally funded, has a goal to support the research agenda and campus niche programs of the University. These achievements have been quantified across several indicators. CSU is tasked to lead in the conduct of discipline-based, policy-oriented, technology-directed and innovative/creative researches that are aligned with the Harmonized National Research Agenda. The quality of researches has also been given focus by encouraging publications in accredited peer reviewed journals.

Despite having less budget than the previous year, there is a significant increase in the number of conducted researches due to grants from external funding, General Appropriations Act (GAA), Supplemental Budget (SB) from Fund 164 of the University, and the continuous capability building program that supported researchers to manage and conduct their researches.

# HIGHLIGHTS OF ACCOMPLISHMENTS

## I. Accomplishment based on NEP

Table 1 presents the physical accomplishment of the Research and Development Office as against the target in the National Expenditure Program (NEP) for CY 2020. In terms of the Outcome Indicator which is the number of research outputs in the last three years utilized by the industry or by other beneficiaries, CSU was able to produce 17 research outputs utilized by the beneficiaries in the last three years as against the target of 13.

For the Output Indicators, Indicator number 1 (Number of research outputs/studies completed within the year), there were a total of 96 completed research outputs accomplished compared to the target of 96.

Moreover, Output Indicator No. 2 (Percentage of research outputs published in internationally refereed or CHED recognized journal within the year), CSU targeted to publish 69 out of the 96 (71.87%) completed researchers and the University was able to publish 71 (73.95%) research outputs in international refereed journals and CHED Accredited Journals. The Physical target and the Physical Accomplishment has a variance of +2.08%

Table 1. Physical accomplishment report

Particulars	UACS CODE	Physical Targets					Physical Accomplishment					Variance	Remarks
		1 <sup>st</sup> Quarter	2 <sup>nd</sup> Quarter	3 <sup>rd</sup> Quarter	4 <sup>th</sup> Quarter	Total	1 <sup>st</sup> Quarter	2 <sup>nd</sup> Quarter	3 <sup>rd</sup> Quarter	4 <sup>th</sup> Quarter	Total		
1	2	3	4	5	6	7	8	9	10	11	12	13	14
<b>RESEARCH PROGRAM</b>	303000000												
<i>Outcome Indicators</i>													
1. Number of research outputs in the last three years utilized by the industry or by other beneficiaries		1	2	4	6	13	1	2	2	12	17	+4	
<i>Output Indicators</i>													
1. Number of research outputs/studies completed within the year		14	23	26	32	96	21	16	28	31	96		
2. Percentage of research outputs published in internationally refereed or CHED recognized journal within the year		10.5% (10/96)	17.89% (17/96)	19.4% (19/96)	23.58% (23/96)	71.87% (69/96)	5.21% (5/96)	22.92% (22/96)	12.5% (12/96)	32.29% (31/96)	73.95% (71/96)	+2.08% (2/96)	

## II. Research & Development Programs/Projects Implemented

In 2020, a total of 355 researches (on-going and completed) were conducted using funds from three sources; 50 from External Funds (38 carry over researches and 12 newly implemented research projects), 168 (146 carry over and 22 newly approved) from General Appropriations Act (Fund 101) and 137 (82 carry over and 55 newly approved) the said researches from Supplemental Budget (Fund 164). Said researches were anchored along R&D's thematic agenda on Food Security and Safety, Health and Nutrition, Engineering, Industry and Energy, ICT, Environment and Climate Change, Business and Entrepreneurship, Law and Governance, and Education and Social Sciences.

Out of the 355 external and institutional researches conducted, 96 were completed and 259 are on-going and will be carried over in 2021. CSU Carig had the highest number of researches conducted (73), followed by CSU Gonzaga (61), CSU Andrews (52), CSU Lallo (37), CSU Aparri and CSU Piat (33), CSU NPRIC (27), CSU Sanchez Mira (25) and the least is CSU Lasam with 14 researches conducted as seen in full detail on Table 2.

### A. Researches conducted in 2020 & fund sources

Table 2. Total number of researches implemented, CY 2020

	Carry Over in 2020				Newly Approved				GRAND TOTAL
	External	Institutional		Total	External	Institutional		Total	
		GAA (Fund101)	Fund 164			GAA (Fund101)	Fund 164		
Total	38	146	82	266	12	22	55	89	355

### B. On-going Researches (carry-over for 2021)

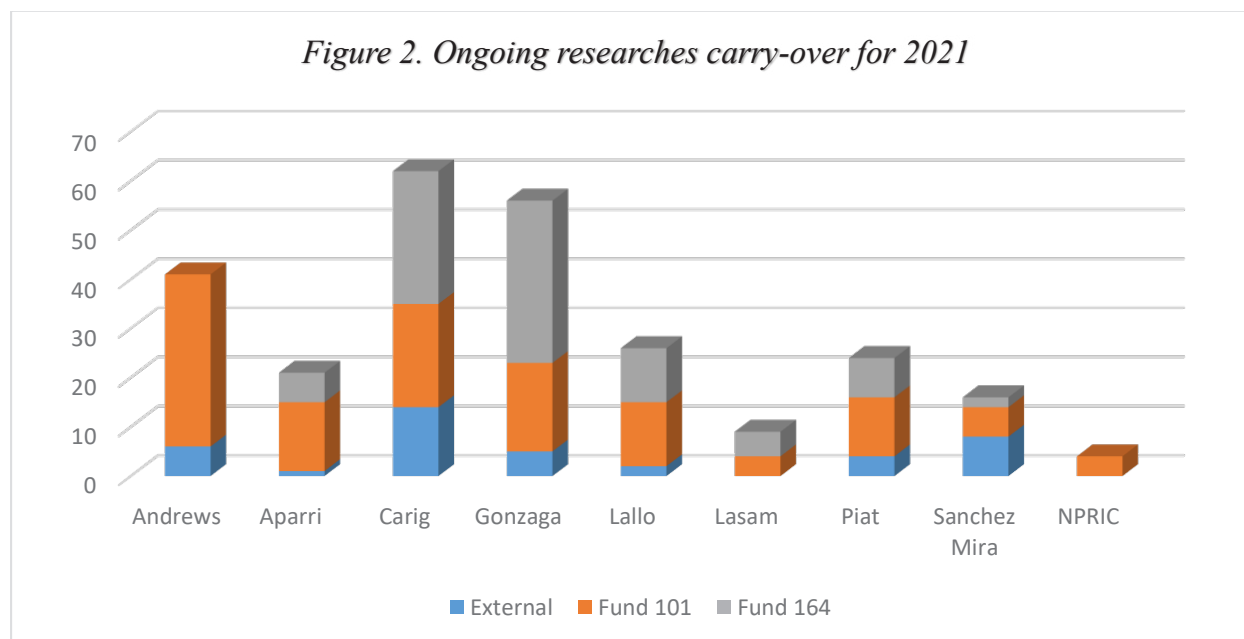

Table 3 below shows the number of on-going researches (carry over and newly approved in 2020) to be carried over for CY 2021. A total of 259 on-going researches were implemented in 2021 with CSU Carig (62) having the most number of on-going researches implemented. This is followed by CSU Gonzaga (56), CSU Andrews (41), CSU Lallo (26), CSU Piat (24), CSU Aparri (21), CSU Sanchez Mira (16), CSU Lasam (9) and CSU NPRIC (4) having the least number of researches carried over for 2021.

Table 3. Number of On-going researches that are carried-over for 2021

	Carry Over for 2021			
	External	Institutional		Total
		GAA Fund101)	Fund 164	
<b>Total</b>	<b>40</b>	<b>127</b>	<b>92</b>	<b>259</b>

Figure 2. Ongoing researches carry-over for 2021

As seen on Figure 2 (On-going Researches for 2020), CSU Carig has the highest carry over researches for 2021 and CSU Lasam has the lowest carry over researches for 2021.

### C. Completed Researches

There were 96 researches completed in 2020, of which, 10 were externally funded (carry over), 41 were funded from the GAA (carry over and newly approved) and 45 were funded through Fund 164 (Table 4).

Table 4. Number of completed researches by campus and fund source, CY 2020

	Total no. of researches implemented in 2020	External	Institutional		TOTAL	
			GAA (Fund 101)	Fund 164	Number completed	Percentage completed
<b>Total</b>	<b>355</b>	<b>10</b>	<b>41</b>	<b>45</b>	<b>96</b>	<b>27.12%</b>

Figure 3 (Completed Researches CY 2020), shows that Natural Product Research Innovation Center (NPRIC) has the most completed researches (23) in 2020.

On the other hand, CSU Gonzaga and CSU Lasam has the least completed researches (5).

#### D. Review and Evaluation of Research Proposals

In 2020, a total of 124 proposals passed through reviews and evaluation by a panel of evaluators before being approved for external and institutional funding. Proposals submitted for external and institutional funding increased as young researchers from the different campuses became more active in doing research. A total of 17 proposals were submitted to external funding agencies and 107 proposals were submitted for institutional funding.

Out of the 124 proposals evaluated, 77 proposals were approved for institutional funding and 12 for external funding.

Table 4. Number of Proposals Reviewed in 2020.

	For External Fund			For Institutional Fund			Grand Total evaluated
	Approved	Not approved	Total No. evaluated	Approved	Not approved	Total No. evaluated	
Total	12	5	17	77	30	107	124

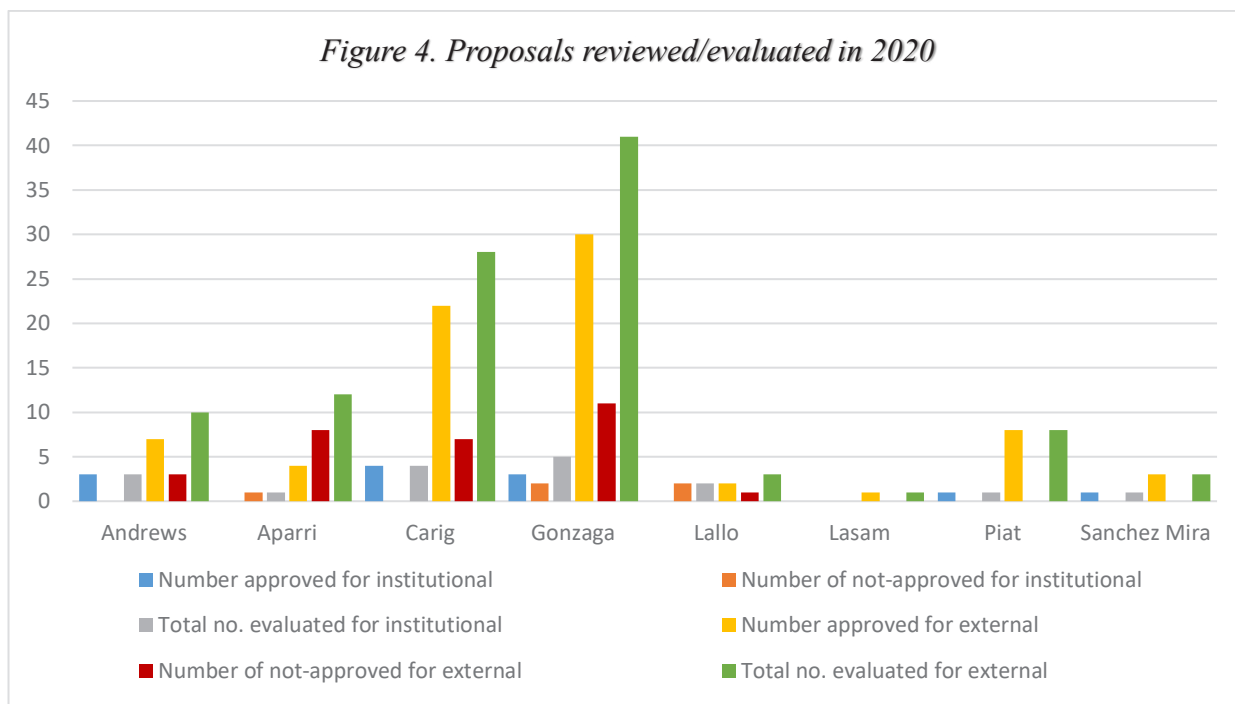

Figure 4 (Proposals reviewed/evaluated and approved) shows that CSU Gonzaga (41) has the most reviewed/evaluated proposals in 2020 for institutional funding and CSU Lasam (1) has the least.

For external funding, CSU Gonzaga has the most proposals submitted for evaluation (5) in 2020.

In terms of proposals approved for external funding, CSU Carig has the most proposals approved (4) and CSU Lallo and CSU Lasam has no proposals approved for external funding. Moreover, CSU Gonzaga has the most approved proposals for institutional funding and CSU Lasam has the least.

### III. Research Monitoring and Evaluation

#### Faculty Awards Received

CSU made a mark in an international setting when it bagged three awards during the International Virtual Research Conference on Sustainable Education. The research of Prof. Ronel T. Pacubat won Best Research Infographics, Finalist for Best Conference Paper, and 3rd Place Best Research Presenter at Bicol State College of Applied Sciences and Technology.

Moreover, CSU Presented 3 research papers during the Health Research Forum for Action in Luzon. 3 papers presented won awards: 2nd place: Oral Research Professional Category, 2nd Place: 3-minute Pitch and 3rd Place: 3-minute Pitch. On the other hand, Dr. Lenimfa P Molina and Dr. Arthur G. Ibanez won the Regional Winner - 2020 Presidential Lingkod Bayan Award of the CSC. The table below shows the summary.

Table 6. List of faculty awards

Title of Award	Title of Research/ Paper	Faculty Awardee	Title of Conference/Fora	Venue & Date
2nd place: Oral Research Professional Category	Formulation of Cornayan (Corn Silk and Bamboo Shoot) Tea for Urinary Tract Infection	Jinky Marie T. Chua	Health Research Forum for Action in Luzon	St Paul University Tuguegarao City/ January 22-24, 2020
2nd Place: 3-minute Pitch	Assessment of Disaster Preparedness as Evacuation Center of Tuguegarao City Schools	Lily Ann Mallabo	Health Research Forum for Action in Luzon	St Paul University Tuguegarao City/ January 22-24, 2020
3rd Place: 3- minute Pitch	Implementation of the Disaster Risk Reduction and Management Plan of Barangays near Pinacanauan River in Tuguegarao City	Jack M. Regala	Health Research Forum for Action in Luzon	St Paul University Tuguegarao City/ January 22-24, 2020

<b>Title of Award</b>	<b>Title of Research/ Paper</b>	<b>Faculty Awardee</b>	<b>Title of Conference/Fora</b>	<b>Venue &amp; Date</b>
Presidential Lingkod Bayan Award of the CSC	Regional Winner - 2020 Presidential Lingkod Bayan Award of the CSC	Lenimfa P. Molina	Regional Winner - 2020 Presidential Lingkod Bayan Award of the CSC	Tuguegarao City/September 30, 2020
Presidential Lingkod Bayan Award of the CSC	Regional Winner- 2020 Presidential Lingkod Bayan award of the CSC	Arthur G. Ibanez	Regional Winner - 2020 Presidential Lingkod Bayan Award of the CSC	Tuguegarao City/September 30, 2020
International Award (3rd Place Best Research Presenter)	Correlates of Pre-service Practice Teaching Performance: An Empirical Study of 4th Year BEED and BSED Students	Ronel Pacubat	International Virtual Research Conference on Sustainable Education	Bicol State College of Applied Sciences and Technology, October 28-30, 2020
International Award Best Research Infographics	Correlates of Pre-service Practice Teaching Performance: An Empirical Study of 4th Year BEED and BSED Students	Ronel Pacubat	International Virtual Research Conference on Sustainable Education	Bicol State College of Applied Sciences and Technology, October 28-30, 2020
International Award Finalist Best Conference Paper	Correlates of Pre-service Practice Teaching Performance: An Empirical Study of 4th Year BEED and BSED Students	Ronel Pacubat	International Virtual Research Conference on Sustainable Education	Bicol State College of Applied Sciences and Technology, October 28-30, 2020

#### IV. R & D Outputs Dissemination

Research outputs/results are disseminated through presentations in scientific conferences/fora, agency in-house reviews, and/or symposium. Another way of disseminating research outputs is through the extension programs of the University where technologies developed are transferred to target adopters of the technology.

##### A. *Presentations Research Outputs in Conferences/Fora/Symposium*

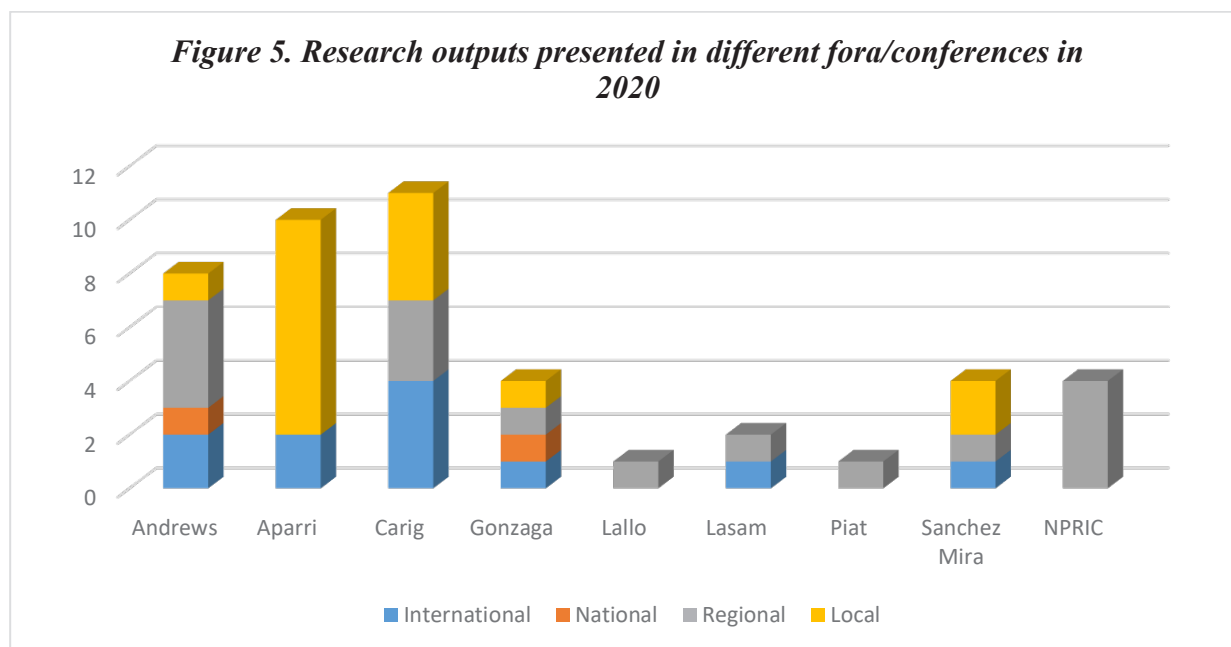

For CY 2020, the R&D Office was able to present a total of 45 research outputs in international, national, Regional and local conferences. A total of 11 papers were presented internationally, 2 papers for national, 16 papers for regional, and 16 papers were presented in local fora.

The campus with the most number of papers presented in international fora / conferences is CSU Carig (4) followed by CSU Andrews and CSU Aparri (2), CSU Gonzaga, CSU Lasam and CSU Sanchez Mira (1) while CSU Lallo, CSU Piat and NPRIC has none.

Only CSU Andrews (1) and CSU Gonzaga (1) have papers presented in the national level. Moreover, CSU Andrews and NPRIC (4) has the most number of papers presented in the Regional level while the CSU Aparri has the most number of papers presented locally. (Table 8 and Figure 5).

Table 8. Number of research outputs presented by level and by campus, CY 2020

	International	National	Regional	Local	TOTAL
Total	11	2	16	16	45

## B. Technology Commercialization / Utilized by Other Beneficiaries

A total of 17 technologies were adopted/transferred/utilized by other beneficiaries from the research outputs to target adopters. These research outputs were continuously commercialized until the end of 2020. CSU Carig has the most technologies commercialized. Such technologies were included in extension projects.

Table 9. Technologies adopted/ transferred or utilized by other beneficiaries

No. of Technology(ies)	Technology
3	<ul style="list-style-type: none"> <li>Nutritional Adequacy of the Daily Stuff at the University Canteens: The Case of a Philippine University</li> <li>Development of Novelty Pots Made of Eggshells Powder</li> <li>Predictors of College Readiness of Senior High School Graduates: Input for Curriculum Alignment, Transition Interventions and Admission Policy</li> </ul>

### C. Publication, Citation and Intellectual Property Application

In 2020, a total of 71 research outputs were published in international refereed journals (Elsivier Scopus) with CSU Andrews (24) having the most outputs published, followed by CSU Piat (12), CSU Aparri and CSU Carig (11), CSU Lallo (5), CSU Lasam (4), CSU Sanchez Mira (3) and CSU Gonzaga (1).

Table 10. Number of research outputs published, CY 2020

	Elsevier Scopus	Thompson Reuters	TOTAL
<b>Total</b>	<b>48</b>	<b>22</b>	<b>71</b>

A total of 37 articles published by CSU Researchers were cited in different articles in refereed international journals or CHED Accredited Journals. Of the 113 citations in International Journals, 52 articles were from CSU Carig, 31 from CSU Lasam, 20 from CSU Andrews, 3 in Sanchez Mira, 2 in CSU Aparri and CSU Piat, 1 in CSU Gonzaga and none from CSU Lallo. Two (2) articles were cited in CHED Accredited Journals, 2 from CSU Andrews. Table 11 shows the summary.

Table 11. Number of Research Articles Cited by Other Researchers in Refereed Journal Articles

	Number of Publication cited	Total Number of Citations in <u>articles published by other researchers in refereed international or CHED-Accredited journal in the Past Three Years</u>		Grand Total
		International Journal	CHED Accredited Journal	
<b>TOTAL</b>	<b>37</b>	<b>111</b>	<b>2</b>	<b>113</b>

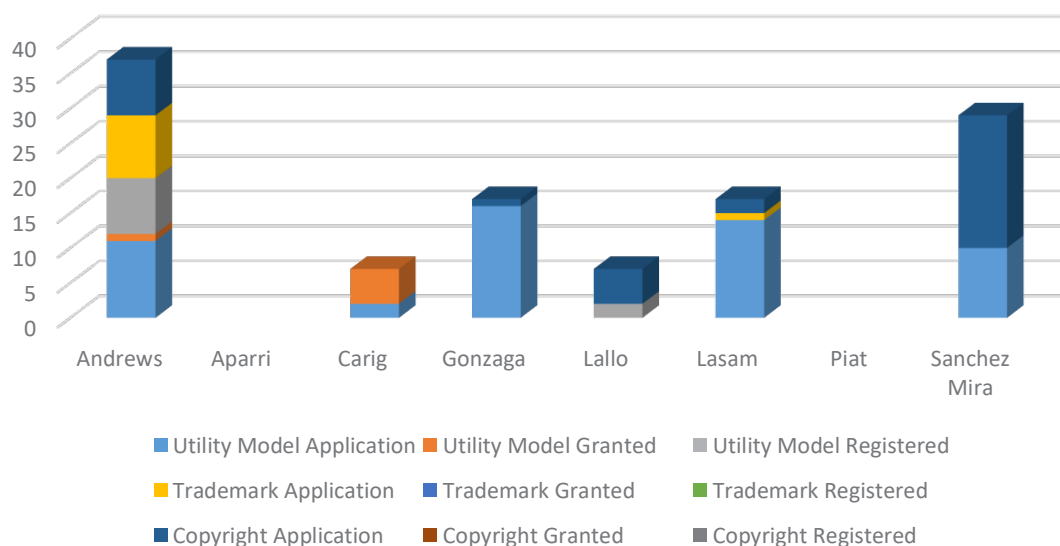

## D. Research Outputs Applied for Deposit /Registration

A total of 53 research outputs have been applied for utility model. Meanwhile, 6 utility models were granted and 10 were registered from the previous applications while 10 research outputs have been applied for Trademark and 19 have been applied for Copyright. The list is presented in Annex Table 8.

Table 11. Number of patents, utility models and copyrights/registration/deposit/applications

	Outputs for Utility Model			Outputs for Trademark			Outputs for Copyright		
	Applicati on	Grante d	Register ed	Applicati on	Grante d	Register ed	Applicati on	Grante d	Register ed
Total	53	6	10	10			19	0	0

*Figure 7. Research outputs applied for Utility model & Copyright in 2020*

## V. Research & Development Capability Building

In order to produce high quality research outputs, the University R&D continuously maintains a critical mass of researchers and experts through an integrated research capability building program to further hone their skills and keep them abreast of the learning curve and draw insights from caliber experts in various disciplines, other areas in research and the like. In 2020, 87 seminar, fora, conferences, trainings and meetings were attended by R&D researchers in different venues and from varying organizations; 14 of which were international, 31 were national, 15 were regional and 27 were local (Table 12).

Moreover, a total of 18 in-house seminars, training-workshops, fora and meetings were conducted in 2020. Most of which were conducted by the RDE Office (Table13).

Table 12. Number of seminars, training, workshops, fora & meetings attended, CY 2019

	International	National	Regional	Local	TOTAL
<b>Total</b>	<b>14</b>	<b>31</b>	<b>15</b>	<b>27</b>	<b>87</b>

Table 13. Number of in-house seminars, training, workshops, fora & meetings conducted, CY 2020

Number of Seminars, training, workshops, fora & meetings conducted
18

## VI. R&D Partnership Developed /Established

Linkages and alliances are important to generate funding or grants for the University. The University R&D also entered into several Memoranda of Agreement and Understanding with other government agencies, NGOs and other SUCs locally, nationally and internationally for the conduct of a number of research and development activities as well as the provisions of technical assistance.

The CSU R&D has been in collaboration with partner Universities such as UP Los Baños, UP Visayas and UP Mindanao in the conduct of researches in the University.

Table 14. List of partnership/linkages

Name of Agency	Nature of Partnership	Name of Research Projects/Activity
CHED RO2	Research Grant	Predictors of College Readiness of Senior High School Graduates: Input for Curriculum Alignment, Transition Interventions and Admission Policy
Department of Science and Technology – Philippine Council for Health Research and Development Council	Research Grant	Risk Assessment of Common Health Problems in Core Shelters of Tuguegarao City
Department of Public Works and Highways	Utilization of and Technical Assistance	Development of Classy Garden Pot with Avian Eggshell Powder and Tatty-Ragged Towel
Commission on Human Rights	Research Consultancy Services	Mandela Rules and the Conduct of Material Conditions of Imprisonment of the Bureau of Jail Management and Penology (BJMP in Region 02: A Comparative Analysis
CSU TLDC Project:	Research Grant	Non-Toxic Bioactive Plant Extracts from Region 02 for Infection and Pain
PCIEERD	Research Grant	HEIRIT: DOST-Business Incubation Zone for Novel and Sustainable Enterprise (BIZNEST)
Department of Trade and Industry	Conduct of Research	2019 Consumer Awareness Survey in Region 2

<b>Name of Agency</b>	<b>Nature of Partnership</b>	<b>Name of Research Projects/Activity</b>
DA-BAR	Research Grant	Surveillance and Detection of Microbe Utilizing Molecular Techniques and Associated Thrips Vector on Onion, Garlic and Mango in Luzon
CHED-DARE TO	Research Grant	Disaster Resiliency Mapping for Mission – Critical Infrastructure and Investment of State Universities and Colleges (SUC) in the Philippines
CSU-DOST-GIA	Research Grant	<p>Program Title: Accelerated R&amp;D Program for Capacity Building of Research and Development Institutions and Industrial Competitiveness: Collaborative Research and Development to Leverage Philippine Economy (CRADLE)</p> <p>Project Title: Development of Efficient Semiochemical Management Method for Banana Flower Thrips</p>
CVHRDC	Research Grant	Knowledge, Attitudes, Beliefs, Practices and Challenges of Frontliners During the COVID-19 Pandemic: A Retrospective Study
CVHRDC	Research Grant	Unravelling the Narratives of Fontliners in Cagayan Province During the COVID-19 Pandemic: A Phenomenological Analysis
BFAR	Technical Assistance	Eel Project
DOST-PCAARRD	Technical assistance and Funding	Eel Project and Hatchery-Rehab

DA-RFO2	Massive Seeds and Seedlings Production Program	2,000,000.00
<b>Total</b>		<b>21,260,000.00</b>

# Technology Business Incubator (TBI)

## BizNEST (Business Incubation Zone for Novel and Sustainable Technology Enterprises)

Cagayan Valley has been identified by NEDA as a province geared towards becoming a Prime Water Resource, Agro-Industrial Hub, and Emerging Tourism Destination by the year 2022. It also has multitudes of small-scale processors of grains, cacao, mushrooms, citrus, mango, banana, dairy products, and many more. However, the lack of infrastructure catering to the large-scale high quality pre and post-harvest processing of its agricultural crops, of which there are surpluses, and marketing linkages has well kept the Cagayan Valley Region from maximizing its potential as a major manufacturing hub in the country.

In response to the challenges being face by the food processing industry in the region, the Cagayan State University – Department of Science and Technology Business Incubation Zone for Novel and Sustainable Technology Enterprises (CSU-DOST BizNEST) was formed. BizNEST is government-funded Technology Business Incubator whose main objective is to support the development of a competitive food industry in Region II by honing the business expertise of its MSMEs and building a network of stakeholders including student entrepreneurs, researchers, business practitioners, investors, government agencies, local government representatives and policy makers.

The TBI office was launched on August 27, 2019 during the Regional Science and Technology Week organized by the Department of Science and Technology Region 02. Being part of the DOST Projects in the university, the TBI office was formally opened by the DOST Secretary, Prof. Fortunato Dela Peña, CSU President, Dr. Urdujah A. Tejada, and DOST R02 director, Engr. Sancho A. Mabborang. The event was highlighted with the presentation of the TBI rationale and objectives by the project leader, Dr. Jose D. Guzman, to the said guests. Full report of this activity is on the succeeding sections. The launching was successfully done accounted as 100% accomplished.

# GOVERNANCE

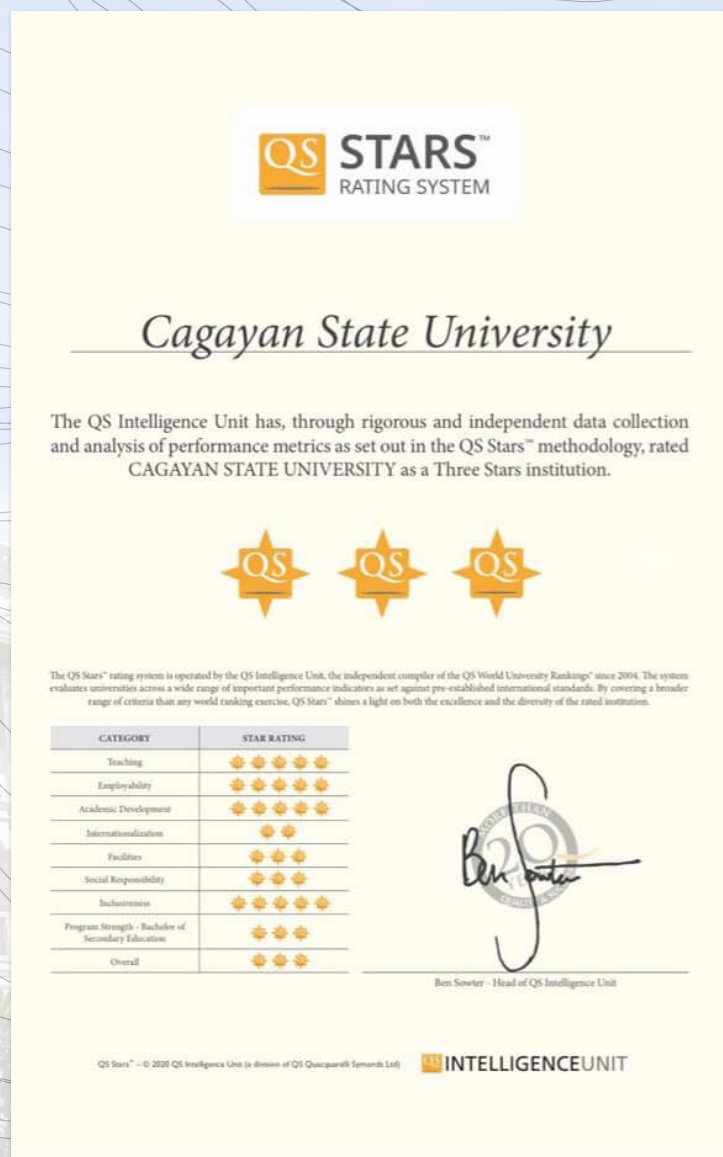

## CSU GETS 3 STARS INSTITUTION RATING BY QS STARS RATING SYSTEM

After rigorous and independent data collection and analysis of performance by the QS Intelligence Unit, Cagayan State University was given an over-all rating of 3 STARS by the QS Stars Rating System.

CSU received the QS Stars Certification last June 26, 2020 which indicated that among the eight performance indicators that are considered as key building blocks of a university, CSU garnered 5 STARS in the core criteria of Teaching, Academic Development, Inclusiveness, and Employability. The University also fared 3 STARS for Facilities, Social Responsibility, and Program Strength, while 2 STARS were given for Internationalization. All of the results were based from the 2019 Accomplishments under the strong and dynamic leadership of President Urdujah G. Alvarado.

QS is a leading global career and education network that helps individuals and companies fulfill their potential through fostering international mobility, educational achievement, and career development. The organization is also known for publishing the QS World University Rankings – a comprehensive listing of the world's top 1,000 universities. QS aims to help students find their dream University through the use of Subject Rankings.

There are only five Universities in the Philippines that have obtained 3 stars in the rating system, with CSU as the new addition. Other educational institutions that have a 3-star ranking include Mapua University, Mariano Marcos State University, Batangas State University, and Mindanao

State University. The new rating of CSU will be published in the [www.topuniversities.com](http://www.topuniversities.com) in a span of one to two weeks. Aside from improving the international recognition of the University, this feat will also allow CSU to reach out to more students through increased web presence and media awareness.

# GENDER AND DEVELOPMENT

In accordance with Republic Act 9710 or the Magna Carta of Women (MCW), the University Gender and Development (GAD) Office strives to mainstream GAD in the university in order to achieve its ultimate goal of promoting gender equality between women and men, empowering women, and creating an abuse-free environment. Consequently, several Gender Mainstreaming (GM) activities were implemented to make the university more gender sensitive.

To raise awareness on gender dynamics and to promote gender equality, Gender Sensitivity Trainings (GST) were conducted to 1,090 male and 1,590 female 1st year students and 678 male and 797 female employees. Moreover, 125 male and 125 female employees were capacitated on the use of Gender Fair Language as a response of the university in creating a gender-responsive curriculum. Likewise, a seminar-workshop on Course Syllabi in Gender and Development was conducted.

The university responded to the needs of the time by conducting a survey to determine the level of anxiety of men and women employees and students. Participated by 420 males and 814 females, it was made as a basis to conduct psychosocial interventions such as webinars on Mental Health among 792 male and 1,122 female students, and 195 male and 158 female employees. Online and tele-counselling were also conducted by the Guidance and Counselling office. Furthermore, symposia on Responsible Parenthood Reproductive Health (RPRH) were participated by 803 male and 926 female students. As GAD aims for inclusivity, the university also provided technical assistance and livelihood skills development trainings to 309 women in adopted barangays.

Moreover, a GAD related research was developed titled, *"Academic Profile and College Preparedness of K-12 Graduates: The Case of the Indigenous Peoples (IPs) in the Northern Philippines"*. Also, there were 3 research proposals developed to address COVID-19 related issues and concerns.

In compliance with RA 9262 and to create an abuse-free environment, numerous fora and lectures on Anti-Violence Against Women and their Children (VAWC), Anti-Sexual Harassment, Anti-Bullying and other forms of abuses were conducted. These were joined by 698 male and 1,178 female students. Similarly, campaign awareness on Committee on Decorum and Investigation (CODI) were conducted among 1,642 male and 2,393 female students. These activities were conducted in November and December, during the 18-day campaign to end VAW.

The university joined the nation in observing several celebrations such as National Women's Month, Indigenous People's Month, and Indigenous People's Right Act (IPRA) Commemoration. These efforts were recognized by the Philippine Commission on Women (PCW) and the National Commission on Indigenous People (NCIP).

These and other gender mainstreaming activities were conducted along instruction, research, and extension. The University has doubled its efforts in promoting gender equality, empowering the marginalized, and in involving the communities it serves in all of its undertakings. Indubitably, Cagayan State University transforms lives.

PHILIPPINE COMMISSION ON WOMEN  
Malacatang, Manila

September 4, 2020

**URDUJAH A. TEJADA**

President  
Cagayan State University  
Caritan Sur, Tuguegarao City  
Cagayan Valley

Attention: **GAD Executive Committee**

**Dear President Tejada:**

Greetings!

The Philippine Commission on Women (PCW) would like to commend your agency for complying with the basic guidelines in preparing and submitting your FY 2020 Gender and Development Plan and Budget (GPB).

In our continued effort to improve the quality and effectiveness of the GAD Plan and Budget Review and Endorsement Process, PCW came up with an evaluation form, which we would like to ask you to fill out accordingly. Please see the attached evaluation form and kindly submit to the Office of the Deputy Director for Operations, Philippine Commission on Women on or before September 24, 2020 via fax at 87364449 or email [ddo@pcw.gov.ph](mailto:ddo@pcw.gov.ph) and [pdad@pcw.gov.ph](mailto:pdad@pcw.gov.ph)

Thank you very much for your continued support to gender and development by complying with the government's GAD planning and budgeting mandate.

Very truly yours,

MARIA KRISTINE JOSEFINA G. BALMES  
Deputy Director for Operations

1145 JP Laurel St., San Miguel 1005, Manila
