Cagayan State University – Gender and Development

EXECUTIVE SUMMARY

This report provides a sex-disaggregated data of enrolled students at Cagayan State University (CSU) for the Academic Year 2024-2025. It showcases the data across all university campuses, including Andrews, Aparri, Carig, Gonzaga, Lal-lo, Lasam, Piat, Sanchez Mira, and Solana.

The primary reason for this initiative is to establish database/databank of the University. This is outlined in its Gender and Development Plan and Budget (GPB). Moreover, this aligns with Memorandum Circular No. 2014-05 of the Philippine Commission on Women (PCW), stating that “all government agencies mandated to implement provisions of the Magna Carta of Women and its Implementing Rules and Regulations to maintain an updated and accurate sex-disaggregated data.” These data will offer insights into student demographics at both a broad and specific level.

Key findings include specific male and female enrollment numbers for each campus. For the said academic year, data revealed that Carig Campus obtained the highest enrollment and Solana Campus the lowest. It further breaks down enrollment by program. This reveal gender representation in particular academic programs including Bachelor of Science in Medical Laboratory Science at Andrews Campus with 790 female and 274 male students, and Bachelor of Science in Civil Engineering at Carig Campus with 455 female and 545 male students.

These data are essential as these provide critical insights and information on gender-related issues and allows for tracking progress on gender equality initiatives, identifying gaps, informing policies and strategic directions, and assessing the impact of client and organization-focused programs not only of the University Gender and Development Office but also of the whole University.
